| 4 | Marketplace Inventory Process | 2:15 – 2:45 |
| | - Goals & tasks | |
| | - Timelines | |
| | - Draft survey questions | |
| 5 | Open Questions | 2:45 – 2:55 |
| 6 | Next steps | 2:55 – 3:00 |

Review 10/6 Meeting Minutes

Marketplace Inventory

Goals:

- Create an inventory of the query and RLS capabilities of existing networks
- Review capabilities and gain a better understanding of the marketplace
- Identify top capabilities for Workgroup endorsement

Tasks:

- Distribute a survey to all Carequality members to collect information on query and RLS capabilities of their representative organizations
- Review capabilities and identify those preferred for Workgroup endorsement
- Present findings to Advisory Council & Steering Committee

Defining “Simple Query”

Simple Query: The ability request and receive one or more documents from a known network/location using IHE document exchange profiles using a defined set of patient identifying data. *Assumptions:*

- The network/location can locate/retrieve documents anywhere within their network/location

Defining RLS

Record Locator Service: The ability to identify the presence of patient records within and across networks to facilitate electronic exchange using a defined set of patient identifying data.

Assumptions:

- Does not assume either centralized or federated EMPIs (enterprise master person index). Either model is valid.
- A record location service can be invoked at various points within an exchange/transaction (e.g., after patient discovery, during consent collection steps, during document retrieval steps)
- Collection of patient authorization is the responsibility of the releasing organization/network

Marketplace Inventory

Timeline

Candidates To Date

- **Simple Query:**
 - eHealth Exchange
 - Interoperability Workgroup
 - Epic Care Anywhere
- **Record Locator Service:**
 - Commonwell
 - Epic Care Anywhere
 - Surescripts

Review Marketplace Inventory Draft Survey Questions

Questions?

Next Steps

- Expand the inventory of Query and RLS capabilities across networks
- Determine evaluation criteria for prioritizing capabilities
- Identify top 3 or 4 capabilities for review using evaluation criteria
- Review capabilities of select networks over the next few meetings
- The next meeting will be held on Monday, Oct. 20
