Questions

Updated Monthly Call Schedule

- We will be moving to every-other-month beginning today.
- Meetings will be held in even-numbered months
- December Monthly Call will be replaced with In-Person Annual Meeting

June in Review

Alan Swenson

Highlights

- Carequality Connected Agreement (CCA) and Carequality Connection Terms Updates
- New Use Case!
- Ongoing workgroup progress
- Operationalizing TEFCA

Carequality Connected Agreement

Alan Swenson

06/30/2022

Update Process

- Last updated in 2019
- Minor updates—mostly clarification—needed for federal agency participation
- Steering Committee approval of Proposed Final Version, Thursday June 2nd
- Implementer Objection Period closes July 2nd
- Effective Date – August 1st

Project Updates

Carequality Team

06/30/2022

FHIR Workgroup

Bill Mehegan

06/30/2022

FHIR IG Workgroup Update

- The workgroup is wrapping up some final edits to create a new version (V2) of the FHIR IG
 - Removed all redundant policy language and now largely point to the overarching Carequality Framework Policies Element: <https://carequality.org/wp-content/uploads/2022/03/Carequality-Framework-Policies-v1.0-20220307-FINAL-1.pdf>
 - Updates to the security/authentication pieces as UDAP goes through the HL7 balloting process: <https://hl7.org/fhir/us/udap-security/2021Sep/>
 - More flexibility around certificates and allowances for Implementers to have more governance/control over this process
- We hope to wrap up the WG sometime in July then have V2 of the IG go through the Carequality update process in August

Image Exchange

Bill Mehegan

06/30/2022

Image Exchange Update

- We are in a holding pattern for partner testing as we wait for some of the imaging vendors to hash out re-org and get their respective Gateways reading for testing.
- However... we're exploring the possibility of moving 1 Implementer (Hyland) to Production.
- This would essentially allow them to exchange images with other Hyland customers; a capability they currently do not have.
- To this end, Hyland has kicked off their initial work on the Directory to make this a reality.

FHIR R4 Directory

Bill Mehegan

06/30/2022

FHIR R4 Directory Update

- We've given R4 Dev Directory access to a number of Implementors to test out the new Directory Implementation Guide and server
- As they navigate through this new environment, we await their feedback and will answer any questions they have
- We'll continue this process through June/July then review the data we've compiled
- We'll figure out next steps/timelines for migrating to R4 as we complete our review and react to any necessary changes

“On behalf of” Queries

Carequality Team

06/30/2022

“On Behalf of” Queries Tiger Team

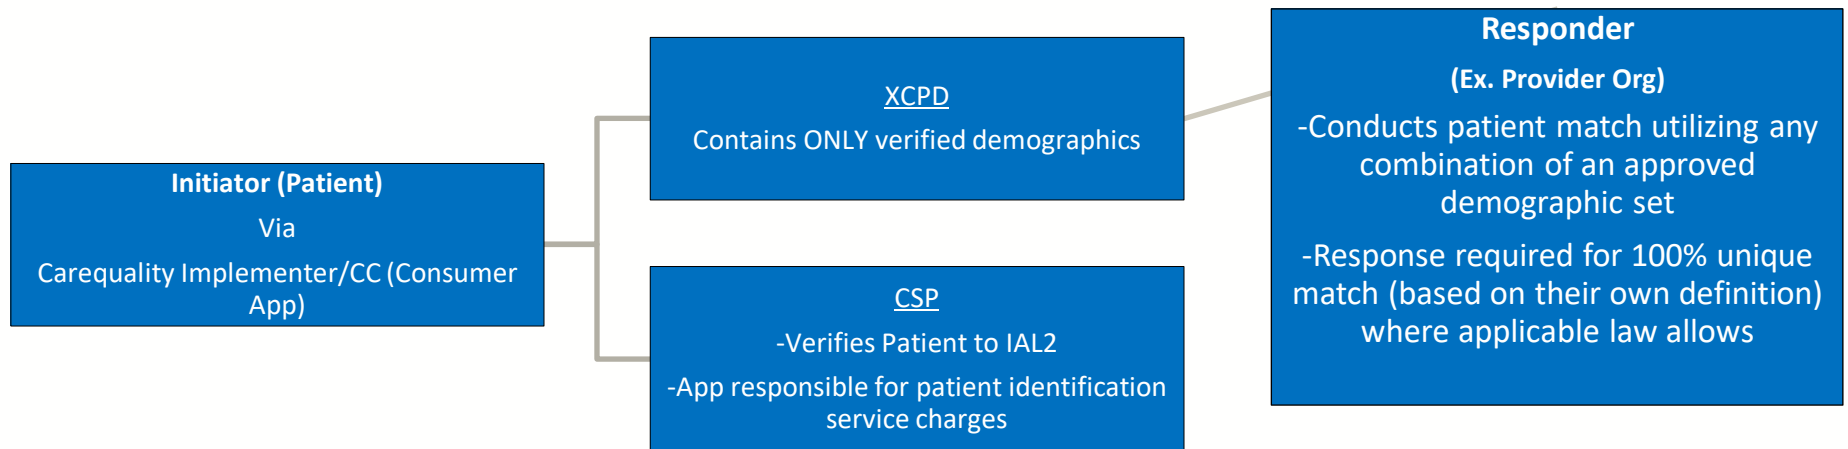

- This Tiger Team kicked off last month because many Implementers want to add Apps as CCs to initiate queries that don't necessarily have information that should be shared in response
- However, the patient's clinical data can be retrieved from another entity in the Carequality ecosystem
- The workgroup continues to explore the best way to make this happen, but we expect to add a couple of values to two separate Directory code sets
- We're also working on adding policy guidelines for whatever solution is deployed, but we're expecting that this functionality will be rolled out with the new Directory (see previous Directory update)

Patient Matching and Payment & HCO Workgroups

Chris Dickerson

06/30/2022

Patient Request Policy Diagram

Provider Organization Meetings

- Both the Patient Matching and Payment and Health Care Operations workgroups are prepared to present their draft policies for feedback from provider organizations
- If you know of any organizations (likely your customers) that would be interested in meeting with our staff to discuss the proposed policies, please contact us at:
 - Admin@carequality.org
 - Subject: Provider Org Policy Feedback
 - Please indicate if the organization is interested in discussing Patient Matching and/or Payment & HCO

Push Notifications

Chris Dickerson

06/30/2022

New Use Case!

- Push Notifications is now live!
 - Thank you to all of the organizations that participated in the pilot testing group!
- Please review the Use Case IG:
 - <http://build.fhir.org/ig/Carequality/CEQSubscription/branches/master/index.html>
- For more information
 - Admin@Carequality.org

Production Operations Update
