Questions

July/August in Review

Alan Swenson

Highlights

- Carequality Connected Agreement (CCA) and Carequality Connection Terms Updates
 - Effective August 1st
- Updated Implementer Fee Schedule
- New Steering Committee membership
- Ongoing workgroup progress
- Operationalizing TECCA

New Steering Committee Membership

Alan Swenson

08/25/2022

New/Returning Members

Representative	Organization
A. John Blair, III, MD	MedAllies, Inc.
Greg Carey	athenahealth
Hans Buitendijk	Cerner Corporation (Oracle subsidiary)
Jennifer Blumenthal	OneRecord
Lucy Johns MPH	Health Care Planning & Policy
Lukasz Nosol	UnitedHealth Group
Nancy Beavin	Humana
Paul Wilder	CommonWell Health Alliance
Roshan Mathew	Advanced Cardiology of Owensboro
Ryan Bramble	CRISP
Steven Lane	Health Gorilla
Vicky Parikh	MedStar Shah Medical Group

Continuing Members

Representative	Organization
Jay Nakashima	eHealth Exchange
Matt Becker	Kno2
Matt Reid	AMA
Melissa Ayres	SSA
Rob Klootwyk	Epic
Ryan Howells	CARIN Alliance

FHIR Workgroup

Bill Mehegan

08/25/2022

FHIR IG Workgroup Update

- The workgroup is wrapping up some final edits to create a new version (V2) of the FHIR IG
- We are also following up regarding extremely large Implementers (who may need thousands of Certs) having the capability to act as their own CA. Ideally, after getting an intermediate certificate from one of the DirectTrust certified CA's, Implementers can then distribute certificates to their clients based upon that Cert. This allows the Cert issuance process to scale as opposed to being unsustainable
- However. Concern has been raised about our plan and we want to be 100% certain that the "Trusted Framework" remains true to form. We continue to meet with internal and external stakeholders about this issue with an eye on arriving at a solution that also works for the QHIN Technical Framework (QTF). We hope to have this wrapped up in the next couple of weeks

Image Exchange

Bill Mehegan

08/25/2022

Image Exchange Update

- We continue to be in a holding pattern for partner testing as we wait for some of the imaging vendors to hash out re-orgs and get their respective Gateways reading for testing
- Hyland continues to explore the possibility of going live by themselves
- This would allow their client base to exchange images with other Hyland customers; a capability they currently do not have
- To this end, Hyland has committed Development resources towards the required Directory piece (their Gateway build is complete.) To be clear, this piece is tied to the R4 version of the Directory being available

FHIR R4 Directory

Bill Mehegan

08/25/2022

FHIR R4 Directory Update

- We've given R4 Dev Directory access to a number of Implementers to test out the new Directory Implementation Guide
- Initial feedback was very limited as most Implementers were confused by the new Directory IG
- There's been a lot of new activity the last few weeks as we continued the feedback loop throughout the month of August
- We'll figure out next steps/timelines for migrating to R4 as we complete our review sometime in September and react to any necessary changes

“On behalf of” Queries

Carequality Team

08/25/2022

“On Behalf of” Queries Tiger Team

- The Tiger Team has completed its work and has identified the technical requirements needed for this new type of CC, which will be ‘rolled in’ to the new R4 Directory
 - Add an “OBO” value to the Initiator Only code set
 - Add an “OBO” FHIR Extension type Identifier. This more aligned with true FHIR customizations and was unanimously approved by the Tiger Team
- Here is a link to the document that outlines the policy and governance guidelines for this new entity
<https://docs.google.com/document/d/1sa3u-hl4R25Su8iY2jbprCIVYIWUQUYu/edit>
- We ran a Straw Proposal by the Advisory Council earlier this month and will be chatting with the Steering Committee next about officially rolling out this new functionality

Patient Matching and Payment & HCO Workgroups

Chris Dickerson

08/25/2022

Provider Organization Meetings

- Both the Patient Matching and Payment and Health Care Operations workgroups are prepared to present their draft policies for feedback from provider organizations
- We need to determine if the draft policies solve the primary concerns that Implementers have had around these PoUs
- If you know of any organizations that would be interested in meeting with our staff to discuss the proposed policies, please contact us at:
 - Admin@carequality.org
 - Subject: Provider Org Policy Feedback
 - Please indicate if the organization is interested in discussing Patient Matching and/or Payment & HCO

Push Notifications

USE CASE

Subscription-Based Event Notifications

Providers and others can now subscribe to receive specific alerts when a designated patient has a healthcare event. Notifications sent through Carequality's framework are based on the provider's preference for each patient subscribed. Examples of healthcare event triggers include a hospitalization, a gap in care, a transfer notice, a referral by another provider, a break in the referral loop, and more.
